- React
- Docker

OĞUZHAN ERÇELİK

JUNIOR BACKEND DEVELOPER

ABOUT

I am always trying to improve my software skills. I am interested in web technologies. I started my web career by learning HTML, CSS in 2021. I learnt React and React Native at the entry level. After that I tried to continue on the backend side. I started to Java Spring Boot and using these technologies I developed a web app and deployed to Heroku. I used MySQL. For cloud, I used AWS.
